

INFORMATION ASSURANCE – REGULATORY COMPLIANCE BUSINESS CONTINUITY PLANNING – SECURITY ASSESSMENTS

Mission Statement:

“To provide a full range of world-class strategic and tactical consulting services to enable our clients to protect their valuable information, be compliant with all governing security policies and regulations, and effectively manage security risks in all aspects of their information technology infrastructure as well as the day-to-day business operations”.

The Morningtown Group LLC (MTG) is an extremely capable and growing Veteran-Owned, Certified Small Business registered with the Central Contracting Registry employing senior-level information technologists, analysts, and strategic management/advisory assistance professionals. Please visit our web site at www.morningtowngroup.com.

MTG provides the complete range of vendor-neutral consultancy services in information security, business continuity and consumer privacy and information survivability. MTG’s clients will be in a position to utilize cutting-edge benefits from the emerging business scenarios that employ new e-commerce and wireless technologies, while remaining safe in the knowledge that the business is protected against unforeseen risks and disasters.

MTG also helps clients comply with various legislative and regulatory requirements and mandates, such as NIST, FIPS, DISA, OSD, DOD, GLBA, SOX and HIPAA. MTG’s services cover all areas where specialist support is required – from top-level policy, strategy and review, to business impact analysis and risk assessment, specification of requirements and design of security, consumer privacy, and business solutions. The MTG ‘toolkit’ also includes remote access, websites, firewalls, email, encryption, intrusion detection, data assurance, and a full range of security products that fit all architectures.

MTG provides the highest-quality strategic and technical assistance available to government agencies and commercial customers because its security consultants are CISSP and CBCP certified with many years of practical consulting experience. The company philosophy is to provide clients with workable solutions tailored to their budget with an approach that is implementation-oriented, as we work closely with our clients in each phase of a consulting engagement to ensure that the outcome is successful.

The capability of MTG to address security strategically is evidenced in its unique Enterprise Security Architecture (ESA) methodology. As organizations increasingly attempt to integrate security needs throughout the enterprise, and to effectively integrate security initiatives that enhance organizational effectiveness, they have discovered that a global, enterprise approach works best.

MTG is one of very few security services companies capable of delivering an ESA to organizations ready for this cutting-edge approach to security. Focusing on the entire enterprise, the MTG approach with ESA is to actually enhance the business operations of an organization while designing and implementing a comprehensive, state-of-the-art security solution. More and more organizations have desired this type of approach to security initiatives so as to maximize the overall effectiveness of their consulting dollars.
